## LOIS

Our own seedling introduction of last year and one that we are proud of. Reports from different parts of the country confirm our claims for it and we are sure that when stocks are available you will find it grown in every place that good Glads are grown. A pure self color flesh pink peach. Growing to better than five feet tall under normal field conditions. With florets up to eight inches across and with six or more open with six to eight more buds showing color. Disease free foliage very broad and drooping allowing for a low cut. Nice plump bulbs that are disease free and very prolific. Bulblets grow well and many bloom first year. Stocks still limited so only large and medium will be sold this season.

Large Bulbs \$5.00 Each—Medium Bulbs \$3.00 Each

## PLEASE READ CAREFULLY

The letter first following the variety such as (K) and (Pf) etc. is abbreviation for the originator of that variety such as (K) Kundred, (Pf) Pfitzer, etc.

Everything we sell is fully guaranteed in every respect, and any error or omission will be promptly and liberally adjusted, if reported. You are at liberty to return any shipment if it does not fully meet your expectations, and purchase price, plus return charges, will be promptly refunded.

Safe delivery of all orders is guaranteed. This includes damages by freezing, so you need not hesitate to order in fall or winter. We will not forward shipments by mail unless weather is such that we feel they can go through to destination safely.

### SECOND CHOICE, PLEASE

Sooner or later, some kinds and sizes of Glad bulbs will be sold out. Saves a lot of time and correspondence if you will kindly name a few varieties that we may send in case sold out of any on your order. Or at least mark your order sheet if we may send another size.

### TERMS

Terms are cash with order except that, if desired, a deposit of 25% will hold order until March 1st, when it will be sent C.O.D. for any amount remaining unpaid at that time.

Charges will be prepaid on all shipments taken from this catalog (other than from wholesale list) to points in the United States. All wholesale orders F.O.B. Monroe.

### DISCOUNT

#### On Orders Taken from Retail Lists

Will allow cash discount of 5% on orders of \$5.00 to \$10.00; 10% on orders of \$10.00 to \$25.00, and will give extras on all orders, so that our customers will all secure additional discount in the way of extra bulbs.

### SPECIAL NOTICE

Do not split quantities as listed. Where a variety is listed at 2 for 15 cents do not order 1 or 2 at a lower price. There is no profit in any item of less than ten cents and very little at that price.

In the event that we are out of one size in a variety, we will substitute the next size in sufficient quantity to cover price, unless otherwise instructed. Just note on your order, "Don't Substitute," if you want sizes ordered only. We never substitute on varieties unless permitted to. Our aim is to please our customers.

### EARLY ORDERS

Early orders are entirely practical and sensible. They insure your receiving the varieties and sizes you want, and they also secure for you the "pick of the crop," and they help us, by relieving our storage space. Many good Glads will be in great demand and hard to find later in the season.

While we like to ship in the fall, we will be glad to hold your order for later shipment if desired.

Please note carefully whether variety is priced "each" or "per 10" or "100".

Five may be ordered at the ten rate. Twenty-five at the 100 rate.

All stock offered and orders accepted subject to prior sale.

No order accepted for less than \$1.00.

### TO LARGE BUYERS

Growers, dealers, etc., who can use large quantities of a variety or a good big order of different varieties of bulbs or bulblets please mail in to us the quantity and kinds you want, and we will quote you on the whole or at least what we can furnish. Chances are we can save you money. **THIS IS FOR LARGE LOTS SO PLEASE DO NOT SEND IN LISTS OF A FEW BULBS FOR SPECIAL QUOTATIONS.**

## GREETINGS

With world conditions as they are today it is a hard proposition to concentrate and get out a catalogue. In fact most bulbs will be sold without a catalogue as with the war over so much territory it leaves this country to supply most every country that grows Glads and buyers from these countries have picked up most all that can be bought. We have, however, reserved what we hope will be enough stocks to supply our customers but would advise that you do not hesitate in ordering as by spring bulbs will not be available. Prices are advancing very fast and can assure you that another year you will not be able to buy at this year's prices. We wish to thank all of you who sent in orders last year and helped to make it the biggest year we have ever had but we have even a bigger supply of bulbs this year and can only hope for our share of your orders again.

Last year we enlarged our storage to better enable us to take care of our bulbs and this season we have added air conditioning to help that much more.

We are listing but very few of the new Glads that came out last season as but a very few of them were outstanding but not to be condemned as it was not a good growing season.

We try to grow only the better of the old and the best of the new, and if the variety that you are interested in is not listed, either write us or look around for a cause of it not being listed as there must be something wrong someplace. We have a test plot of several acres that we try to grow all the new ones that comes out and many more of them are discarded than are listed for one reason or another.

If you will follow the key chart that we started several years ago you will be able to get as accurate a description of the Glads performance as we can give you, as we change the ratings each year as we check everything as it grows.

We are giving a complete chart to each variety that we feel the traits are more or less permanently set in. However, some of the newer ones we have not grown long enough to be accurate on, and even a few of the older varieties change from season to season.

Our bulbs are all planted by hand, dug by hand, cleaned by hand, and graded by hand to insure you getting just as nice a bulb as can be produced. No more bruising than is necessary. Every bulb is removed that does not look just right, etc., all by hand, so that you receive only A-1 bulbs. Ask any of our customers, they can tell you.

If interested in large quantities, write for wholesale list.

Our colored slides were very popular last year and traveled from coast to coast. Many thanks for the fine letters received about them. We were only too well pleased to send them to you for your meetings. These slides are available again this year. If interested just write for dates and if possible we will send them to you, free of charge, of course.

## OUR MAILING LIST

Our mailing list is revised each year, as you well know it is useless for us to send you catalogues each year if you are no longer interested in Glads.

We are not stingy with our catalogues and will send you one if you are only interested and we know it. So there are two ways to let us know if you still want to remain on our mailing list. One is to send us an order, the other is to drop us a line asking for catalogues.

We do not expect an order from every one every year, so if you are still interested and do not receive a catalogue just let us know and we will send one P.D.Q.

---

If you have a neighbor who grows Glads, send us their name and we will send them our catalogue. We'll do something for you sometime.
